TECHNICAL SKILLS

PROGRAMMING

- Python
- C++
- Java
- SQL

AI & COMPUTER VISION

- TensorFlow
- Keras
- OpenCV
- NumPy

SYSTEMS & DEVOPS

- Linux
- Docker
- Git

ENGINEERING

- Industrial Automation
- Technical Diagnostics
- Embedded Systems
- FPGA (VHDL)

PROFILE

Computer Engineering graduate from Cracow University of Technology with 6 years of industrial experience in automation, technical diagnostics and maintenance.

Skilled in Python, C++, Linux, Docker, AI/ML and Computer Vision. Interested in robotics, simulation, embedded systems and intelligent industrial applications.

PROFESSIONAL EXPERIENCE

● Wind Turbine Technician 2024 - 2025

RES Energy

- Diagnostics and servicing of wind turbines
- Maintenance of electrical and mechanical systems
- Technical inspections and condition analysis
- Work in safety-critical environments

● Automation Technician 2020 - 2024

PKP PLK S.A.

- Diagnostics and maintenance of technical systems
- Failure analysis and troubleshooting
- Technical documentation management
- Ensuring operational continuity of railway infrastructure

PROJECTS

AI Image Colorization | [Engineering Thesis](#)

Developed an image colorization system using deep learning architectures including CNN, U-Net and GAN models. Trained and evaluated models on a custom dataset.

Technologies: Python, TensorFlow, Keras, OpenCV, NumPy

NovaDerm | [Client Project](#)

Developed a commercial website and CMS solution for a laser depilation clinic.

Technologies: Python, Flask, SQLite

Education

2020 - 2025

Cracow University of Technology

BEng in Computer Engineering

Specialization: Computer Engineering
